

Bannister Complex Skylight Project

The KC South Field Office is excited to be involved in the construction of the new skylight. The skylight is located at the entrance to the Plaza Level Auditorium, Building 1. The skylight measures 40'x 80', and extends above the existing Bannister Complex roof. A corridor will be constructed in order for all tenants to enjoy the natural light that will compliment the existing warehouse space. The Field Office would like to thank the tenants for their patience with this project, which is scheduled for completion in the spring.
